

Johan Athial

(704) 953-0709 | johanpathial@gmail.com | linkedin.com/in/johan-athial

Education

University of North Carolina at Charlotte – Charlotte, NC

Dec 2027

Bachelor of Science in Data Science GPA 4.0 | Dean's List Recipient

Minors in Software Development and Statistics

Central Piedmont Community College – Charlotte, NC

Aug 2024 – Dec 2025

Associate of Arts in Computer Science GPA 4.0

Experience

NC Department of Information Technology – Remote

May 2026 – August 2026

Software Intelligence Analyst Intern

- Developed a Power BI dashboard that helped executives visualize team projects and understand the roles each team member played across those projects.
- Performed software testing across the DMV mainframe and other DMV systems, identifying defects and tracking defect rates and test results in qTest.
- Generated CAST Imaging reports on internal structures of mainframe applications to support developers in analyzing application architecture and development efforts.
- Developed a Power Automate workflow to retrieve ServiceNow ticket data, format the information, and organize the resulting files in a SharePoint folder.
- Diagnosed and resolved a bug in a Python script used to generate reports on JCL jobs within the DMV mainframe system, restoring the script's intended functionality.

Wycliffe – Charlotte, NC

June 2025 – August 2025

Software Engineer Intern

- Designed and implemented a benchmarking system to evaluate and rank Large Language Models (LLMs) based on translation performance across multiple languages.
- Integrated APIs from OpenAI GPT-4 and Gemini 2.5 Flash to collect standardized model outputs for consistent comparative analysis.
- Built a data processing pipeline to clean, organize, and store model responses for evaluation and scoring.
- Developed an interactive Streamlit web application to visualize model rankings and performance metrics for developer decision-making.
- Created a reusable evaluation framework for testing LLM translation quality across datasets.

Projects

Zerve Datathon: Data Analysis Competition (Python)

- Analyzed application event data to identify key user actions associated with successful outcomes on the Zerve platform.
- Built data visualizations to showcase behavioral patterns and engagement trends.
- Developed predictive models to estimate likelihood of user success based on interaction data.
- Compiled findings into a concise presentation and delivered insights to Zerve co-founder.

Titanic Simulator (Python)

- Performed exploratory data analysis using Pandas and Seaborn to identify survival trends and feature relationships.
- Designed and implemented an ELT pipeline orchestrated across AWS and Snowflake to ingest, transform, and store data.
- Trained and evaluated a Scikit-learn classification model achieving 87% accuracy on a binary prediction task.
- Demonstrated an end-to-end workflow from raw data ingestion to model training and evaluation.

Class Schedule Planner (Java)

- Developed a Java-based scheduling application to help students organize classes and activities.
- Designed program logic to manage time conflicts and improve scheduling efficiency.
- Implemented an object-oriented design pattern to structure scalable and maintainable code.
- Focused on user-centered design to create an intuitive and practical planning tool.

Skills

Programming: Python, Java, SQL, JavaScript

Data & Machine Learning: Pandas, NumPy, Scikit-learn, PyTorch, SAS

Data Engineering & Cloud: AWS, Snowflake, ELT Pipelines, FastAPI

Visualization & Development Tools: Power BI, Tableau, Streamlit, Power Automate, Git, Excel

Interests

Pickleball, Table Tennis, Speed Cubing
